## PROGRAM Q&As

### How is tire replacement coverage calculated?

Tire replaced for 36 months from the retail date of sale when damaged by valid road hazard, while the tread depth remaining is more than 2/32". Tire replacement of the original purchase price, replacement tire cost, or benefit level (whichever is less) is covered as follows:

- 1st year = 100% replacement
- 2nd year = 50% replacement
- 3rd year = 25% replacement

### What are the coverage levels?

The maximum replacement benefit limit is \$400.

### Is flat tire changing assistance included?

Every level of coverage includes coast-to-coast, 24/7 Flat Tire Changing Assistance with reimbursement up to \$75 as a core benefit.

### Are flat repairs covered?

Yes, up to \$20 reimbursement for flat repairs is available to the dealer for up to two incidents during the covered period.

### What does the program cost?

The cost of road hazard coverage to the dealer is calculated based on a percentage of the original tire purchase price paid by the consumer. We then recommend that you resell coverage to the consumer at 10 to 20% of the original tire purchase price.

### How does dealer settlement work?

You will make weekly payment to Sonsio for your road hazard sales via EFT (preferred method) or by credit card. Approved claims will be paid via credit card or check within 2 to 4 days of claim approval.

*Refer to the Terms and Conditions for full details on all benefits listed.*
